Education

Bowie State University
Bachelor's of Computer Technology

December 2022
Bowie, MD

Skills

Python • C++ • Git • Windows • Linux • HTML • CSS • PHP • MySQL • Java • Javascript • SCSS • C# •
Bootstrap • AngularJS • Php • Axure • Server Administration

Experience

Fullstack Intern

Sandia National Laboratories

June 2022 – June 2023
Albuquerque, NM

- Boosted the engagement by 20% with the site through gamification of front-end SPA leveraging Bootstrap and AngularJS
- Designing website page mockups using Axure, these mockups were later used to create a new page on the site
- Worked on Node.js script to work with API caches, these caches were memory clutter, and the script helped to clear them out efficiently

Web Developer

Yeletech Security

July 2020 – September 2020
Owning Mills, MD

- Collaborated in the development of the company information site
- Managed site design and programmed dynamic of web forms using CSS.
- Improved the user experience of the site by giving the site a minimalist feel through Jscript and CSS making the site easier to maneuver

Software Engineer Apprentice

Expedia

June 2017 – August 2017
Bellevue, WA

- Undertook a dual intern intended role as an upcoming college freshman
- Developed a Python sentimental analysis software that leveraged machine learning through banked sentiment words to determine sentiment in social media posts involving the Expedia company.
- The software helped to improve marketing and customer service strategies for the company

Projects

DevOps Tutoring Schedule Site

Repo: <https://github.com/toluwanimi1/Tutor-Scheduling>

- Led a team of 8 computer technology majors to build a tutoring scheduling app for undergraduate students at Bowie State University
- The site allows students to find tutors for various subjects.
- Charged as assistant manager with managing the project process through a calendar and messaging app
- The Project involved using HTML, CSS, and JS.
- Hardware used in the project involved a Raspberry Pi

Portfolio

<https://toluwanimi1.github.io/My-Portfolio/>

- Developed a responsive and dynamic portfolio website using React and Tailwind CSS, showcasing projects and professional skills effectively.
- Implemented modular and reusable components in React to ensure maintainability and scalability of the codebase.
- Integrated modern web development tools and practices, such as state management with Redux and CSS-in-JS with Tailwind CSS, to enhance user experience and design consistency
